Professional Summary

Backend Engineer with 4.5+ years of experience designing, developing and maintaining enterprise applications using C#, .NET Core, ASP.NET MVC and ASP.NET Core. Skilled in building scalable REST APIs, integrating third-party services including payment gateways, and delivering backend solutions for SaaS and ERP platforms across LegalTech, HealthTech and Education domains. Hands-on experience with AWS services including SQS, SES and EventBridge for event-driven processing workflows, alongside strong database expertise in SQL Server and PostgreSQL. Experienced in Agile delivery environments with a consistent focus on application performance optimization, production stability and clean, maintainable code. Proficient with AI-assisted development tools including GitHub Copilot and Claude to improve development productivity, documentation and code quality.

Technical Skills

- **Languages :** C#, JavaScript
- **Backend :** .NET Core, ASP.NET MVC, ASP.NET Web API, Entity Framework, LINQ
- **Frontend (Basic) :** HTML, CSS, Bootstrap
- **Databases :** SQL Server, PostgreSQL
- **Cloud & Messaging :** AWS (SES, EventBridge, SQS), Redis, RabbitMQ
- **Integrations :** Payment Gateway, Third-Party API, SignalR, Firebase Cloud Messaging (FCM)
- **Version Control and Tools :** Git (GitHub), TortoiseSVN, Azure DevOps (TFS), Postman, SSMS
- **Practices :** Agile (Scrum), REST API Design, Performance Optimization, SDLC
- **AI-Assisted Development :** GitHub Copilot, Claude AI (VS Code)

Professional Experience

Casepoint LLC, Surat| Software Engineer | May 2025 – Present

- Develop backend modules for a large-scale LegalTech (eDiscovery) platform supporting US federal agencies.
- Design and maintain backend services and data processing workflows using ASP.NET MVC and .NET technologies.
- Improved email processing performance by approximately 80%, reducing execution time from 7–10 hours to around 1–1.5 hours using AWS SES, EventBridge and SQS.
- Contribute to FOIA-related backend features and multilingual content processing.
- Participate in platform modernization and migration initiatives by enhancing existing modules and developing new functionality.
- Optimize SQL queries and refactor legacy code to improve scalability, maintainability and system performance.
- Collaborate with product, QA and engineering teams throughout development and release cycles.
- Worked in an Agile (Scrum) environment, participating in sprint planning, backlog refinement, daily standups, and code reviews using Azure DevOps.

Vision Infotech, Navsari | Jr. Dotnet Developer | Feb 2024 – Apr 2025

- Developed and enhanced backend features for enterprise applications using .NET technologies.
- Collaborated with clients and internal teams to gather requirements and deliver technical solutions.
- Implemented new modules, resolved production issues and improved application reliability.
- Performed database enhancements and query optimization for efficient data processing.
- Participated in maintenance, debugging and application support activities.

Zibma Infotech, Surat | Dotnet Developer | Dec 2021 – Jan 2024

- Developed ERP-based web applications used by educational institutions.
- Managed and processed datasets exceeding 100,000 records while maintaining application performance.
- Developed reporting modules for multiple user roles and business workflows.
- Integrated third-party services including payment gateways and Google Maps.
- Optimized SQL queries and resolved production issues to improve stability and performance.
- Collaborated with cross-functional teams to deliver new features and enhancements.

Projects

VCDoctor - Telehealth Platform

Tech: ASP.NET MVC (Razor Pages), SQL, SignalR, Firebase

- Integrated Stripe and PayPal payment gateways.
- Integrated Vonage for real-time video consultation functionality.
- Developed backend APIs supporting web and mobile communication.
- Implemented one-to-one messaging functionality using SignalR.
- Integrated Firebase Cloud Messaging for call notifications and multi-device signaling.
- Improved application reliability through testing and backend optimization.

Zibma School ERP - Educational Management System

Tech: ASP.NET Web Pages, .NET Core (API), SQL, Firebase

- Developed ERP modules supporting multiple educational institutions.
- Built and integrated .NET Core APIs into an existing ASP.NET application.
- Built custom reporting features for different user roles, improving data accessibility and operational efficiency.
- Integrated Google Maps and payment gateways including PayPal and CCAvenue.
- Implemented Firebase notifications for attendance, fee and announcement updates.
- Optimized database queries and improved system performance and stability.
- Collaborated with frontend teams to ensure smooth backend-to-UI integration.

HRMS - Human Resource Management System

Tech: .NET Core, Angular, SQL

- Developed employee management and payroll functionality.
- Optimized SQL queries to improve data retrieval performance.
- Implemented pagination to reduce load times and improve user experience.
- Collaborated with frontend developers for seamless API integration.

Education

Bachelor of Computer Applications

Veer Narmad South Gujarat University(VNSGU), Surat, India | 2017-2020
